DETAILED ACTION

Status of the Claims

Claims 1-48 are currently pending.

Claims 1-3, 16-27, 38-40, 43 and 48 are withdrawn from consideration as being directed to a nonelected invention.

Claims 4-15, 28-37, 41, 42 and 44-47 are under consideration.

Election/Restrictions

Applicant's election, Paper No. 17, with traverse, of Group II (claims 4-15, 28-37, 41, 42 and 44-47) and Applicant's further election of PRNK (seq. Id. 2) as a species, is also acknowledged. The traversal is on the ground(s) that the reasons provided for restriction groups I-III are "conclusory" and that the examiner's assertion of "pharmaceutical" (e.g. in contrast to diagnostic) use fails to provide "the means for, or the feasibility of, using the claimed peptides as pharmaceuticals". These arguments are not found persuasive for the reasons provided in the reasons for restriction e.g. patentably distinct peptides, different searches (including classification) and burdensome search and the pharmaceutical assertion is supported by applicant's own specification (e.g. pages 1-3). Turning to the election of species, applicant argues that searching P4-P3-P2-P1 is not "burdensome". This is not found persuasive for the reasons provided in the office action e.g. burdensome manual/computer bibliographic and sequence searches requires for individual peptides and for various genres and subgenerics presently claimed (e.g. comprising, NH blocked and/or COOH blocked).

The requirement is still deemed proper and is therefore made FINAL.

The elected species was not found and the search was therefore extended.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

The information disclosure statement filed April 1, 2002 (paper no. 7) fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. References recited on the PTO-1449 lacking copies have not been considered (as indicated by line through the references).

Claim Objections

Claims 14 and 46 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The peptide PANK is not provided as a generic species.

Allowabl Subject Matter

Claims 4-15 , 28-37, 44 and 46-47 are objected to as being dependent upon a rejected base claim or as containing nonelected subject matter (E.g. claim 4 must be rewritten) , but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or suggest the use of N-terminally blocked (e.g. acetylated)/C-terminally fluorogenic tetrapeptides of the sequence P[KR][any amino acid, especiallyN] [KR] and their use in kits/assays for screening Beta-tryptase activity (e.g. use of aprotinin to inactivate proteases other than Beta-tryptase).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 41, 42 and 45 are rejected under 35 U.S.C. 102(a,b) as being anticipated by Wei et al. WO 98/50579 (11/98).

Wei et al. teach fluorogenic protease substrates and kits (e.g. containers) thereof (e.g see page 2) which comprise the sequence Val-Pro-Arg-Gly-Lys (e.g. in solution see page 9; and examples and claims) which is within the scope of the presently claimed invention where: P4-P3-P2-P1 is Pro-Arg-Gly-Lys and Pro which at least one "detectable leaving group" (e.g fluorogenic) bound to P4-P3-P2-P1 (e.g. at the amino and/or carboxyl terminus) via an "amide bond". It is noted that in a compound/composition claim intended use language (e. g. "for analyzing samples for Beta-tryptase activity") is not afforded patentable weight.
